

Western Maple - Live Edge

Last Revised 11/12/2019 - A&D

PRODUCT DESCRIPTION

Each of our Western Maple Live Edge tabletops reflect the unique tree from which it is made. We carefully remove the bark to reveal the natural edge of the wood. This organic element, combined with the surface checking and cracks, create truly distinct features that dictate the character of the piece. Western Maple is a Pacific Northwest native species and varies in color from reddish white with a grayish cast to a light pinkish-brown. The grain is most often straight with occasional wavy, quilted, fiddleback, or birds-eye patterns.

SPECIFICATIONS

STANDARD SIZING

2" thick

Sized to your specifications

Rounding, shaping, and cutouts are available upon request

MATERIAL AND SURFACE

Janka hardness scale of 850

Features a natural live edge of the tree with bark removed

The live edge can be mounted up (standard) or down, *specify when ordering*

Planks typically 4" to 8" wide, but vary in width depending on availability

Finished top and side surfaces sanded to 220 grit
