

Installation Methods

Our work with interior designers, architects, installers, and general contractors has taught us that the **total cost of product and installation** is often missed when a project is designed. With that in mind, our products can be installed in 2 or 3 methods, depending on the specific products.

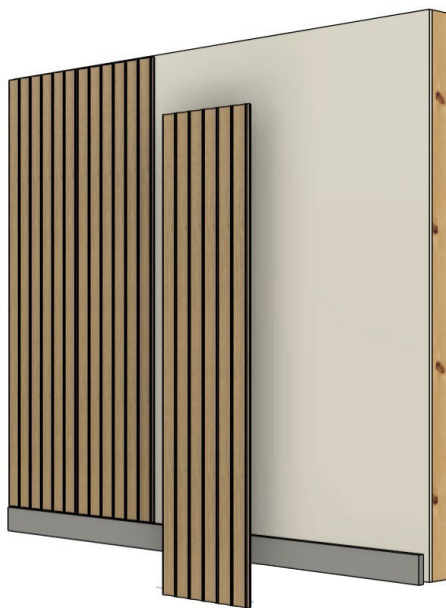

See our Installation by Product sheet (below) for a list of all of our products and how they each can be installed.

One System. Three Installation Methods.

- **Sticks** - Linear wood profiles for a clean, timeless aesthetic
- **Panels** - Prefinished architectural panels in hundreds of colors and textures
- **Cambio by Windfall** - A patented magnetic wall system that redefines flexibility

Our wall products are made to work for you—designed for easy installation, material reuse, and standout results. Whether you choose sticks, panels, or our patented magnetic system, you'll benefit from consistent quality and custom solutions.

Tongue + groove cladding (loose sticks)
traditional install with nails + adhesive

Panels installed using fixed mounted fastener
