

Windfall + Cambio Installation Methods

A Wall System Defined by Installation

Installation determines total cost, speed, and long-term adaptability. Our collaboration with designers, architects, installers, and general contractors has shown that projects succeed when **installation strategy is defined early**—not treated as an afterthought. Windfall products are engineered so each profile and finish can be installed using one of three methodologies, allowing teams to match performance requirements without altering design intent.

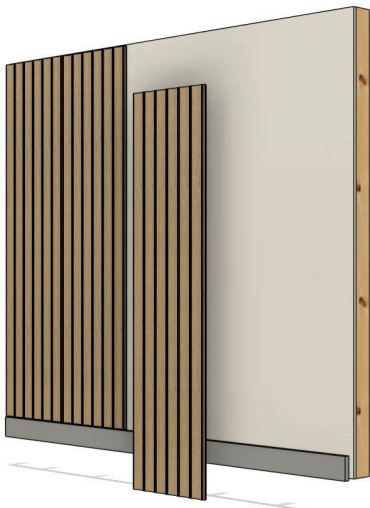

Three installation methods. One integrated system.

- **Sticks** - Linear wood profiles
- **Panels** - Prefinished architectural panels
- **Cambio by Windfall** - Patented magnetic wall system with prefinished architectural panels

Sticks

Direct-Applied. Permanent. Precise.

Installed profile-by-profile for projects where alignment, detailing, and material expression matter most.

Panels

Prefabricated. Consistent. Efficient.

Factory-built panels that deliver fast, predictable installation across large surface areas.

Cambio

Magnetic. Rapid. Reconfigurable.

Panels install and remove in minutes—enabling effortless updates without demolition.
