

WESTERN MAPLE TREADS + LANDINGS

TREADS + LANDINGS

Western Maple Plank or face grain style wood treads and landings are built with parallel strips of wood typically 4" to 6" wide, varying in width depending on top dimensions and availability.

Western Maple Side Grain treads and landings are built with the edge grain of the wood facing up in parallel strips typically measuring between 3/4" and 1-1/4".

Western Maple is a Pacific Northwest native species and varies in color from reddish white with a grayish cast to a light pinkish-brown. The grain is most often straight with occasional wavy, quilted, fiddleback, or birds-eye patterns.
