

Where Sustainability Meets Craftsmanship

At Windfall, sustainability isn't a trend-it's our foundation. From day one, we've prioritized reclaimed and responsibly sourced materials, designed for a long-term durability and built to support a truly circular system. We never compromise on beauty or quality. Every piece is crafted by artisans in the Pacific Northwest, blending high design with meticulous craftsmanship. Our DNA is rooted in full circular design- from thoughtful sourcing to our end-of-life recycling program, **Re-Made**.

Designed for Change

As we developed our products, our primary focus was to offer people an easy way to change materials.

Re-Made

We will take back any panels for a 100% reuse.

Minimal Waste

When manufactured, we minimize waste in the process. When installed, Windfall is a zero-waste product.

Up-cycle + Testing

All of Windfall products can be taken a part and reused again.

Re-use + Longevity

We believe architectural products don't have to contribute to the waste stream. They have a life, again and again.
