Windfall + Cambio by Windfall

Case Study

CorpSmart

Location
Olympia, WA

Panel Materials
Acoustic Fabric
Rainier Fins

Panel Size
Custom size
18" x 90"

Use
Office space

Why Windfall?

"Sound attenuation requirements were necessary. Windfall solved this with acoustic decorative fabric panels that were positioned throughout the facility. Windfall also supplied necessary decorative wood product accents utilized in a main stairwell tread trim detail and on custom designed reception and workstations in the interior of the building."

Cambio/Windfall provided smart solutions with beautiful finishes in the applications needed. Scott and his team were excellent partners to have achieving these solutions."
-Mike Reid

Why Cambio?

*"Cambio solved an application on a curved wall with the decorative Rainier fins. The Rainier product projected a beauty and sophistication the client wished to achieve in an interior space and the sound attenuation in its composition and engineering solved the echoing we encountered in that room space."
