Why Cambio?
"Cambio delivered a high-quality solution while minimizing mounted depth. Its support structure installed directly to Floor trusses, maximizing ceiling height—one of our key design goals. With a slim 1.75" profile, it offers easy access to overhead systems and arrange of premium finishes, ensuring both flexibility and aesthetics. Plus, being locally made in Thurston County aligned with our client's values. Cambio was the perfect choice for our tight design parameters".
-Bobbi Kerr
SVP Chief Federal Savings
